PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience architecting secure, role-based web applications using Java, Spring Boot, Spring Security, JWT, React.js, MySQL, and RESTful APIs. Delivered end-to-end features spanning authentication, transaction workflows, and admin systems using MVC architecture and JPA/Hibernate. Complements full-stack engineering with applied AI experience in LLM evaluation and instruction tuning. MCA candidate with strong foundations in Data Structures, Algorithms, OOP, and DBMS, focused on shipping scalable, production-minded software.

FULL-STACK DEVELOPMENT PROJECTS

Real Estate Hub | Full-Stack Real Estate Marketplace Platform | [Code: GitHub Repo](#)

Java • Spring Boot • React.js • MySQL • Spring Security • JWT • REST API • JPA/Hibernate • Tailwind CSS

- Architected a full-stack real estate marketplace supporting 3 distinct user roles (customer, property owner, admin) by integrating a React.js frontend with Spring Boot REST APIs and a MySQL database via JPA/Hibernate.
- Secured multi-role workflows against unauthorized access by designing and implementing JWT-based authentication and role-based access control (RBAC) using Spring Security.
- Enabled end-to-end property transactions - booking, wallet payments, sale inquiries, negotiation, and admin approvals - by building RESTful APIs and a responsive Tailwind CSS interface.
- Validated API reliability across all roles and workflows by testing endpoints in Postman before frontend integration, reducing integration-time defects.

TATA GearHub | Online Car Showroom Web Application

Java • JSP • Servlet • JDBC • MySQL • HTML • CSS • MVC Architecture

- Delivered a full-stack car showroom platform enabling real-time online booking by building Java Servlets and JSP views on an MVC architecture with JDBC-backed MySQL persistence.
- Strengthened application security and reliability by implementing authenticated login workflows and structured session handling, improving end-to-end user experience.

PROFESSIONAL EXPERIENCE

LLM Post-Training Intern (AI/ML) | Ethara AI

March 2026 – June 2026

- Improved model response consistency and reduced error rates by designing and executing 100+ structured LLM evaluations across 5+ domains using standardized scoring rubrics.
- Increased reasoning accuracy an estimated 15–20% across targeted task domains by curating and annotating 500+ high-quality instruction-tuning training samples.
- Accelerated model correction turnaround by identifying and documenting 50+ recurring failure patterns - hallucinations, factual errors, coherence issues - through systematic root-cause analysis.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript (ES6), HTML5, CSS3

Backend: Spring Boot, Spring Security, JWT, JPA/Hibernate, Servlet, JSP, JDBC, RESTful API Design, MVC Architecture

Frontend: React.js, Tailwind CSS, Responsive Web Design

Databases: MySQL, Query Optimization

Tools & Platforms: Git, GitHub, NetBeans, Visual Studio Code, SQLyog, Postman

AI/ML: LLM Evaluation, Instruction Tuning, Model Alignment, Benchmark Design, Data Annotation, RLHF

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, System Design Fundamentals

Core Competencies: Software Development Life Cycle (SDLC), Debugging & Troubleshooting, Problem Solving, Cross-Functional Collaboration, Technical Communication, Adaptability

EDUCATION

Master of Computer Applications (MCA) | DAVV – School of Computer Science & IT, Indore

2024 – 2026

CGPA: 7.0

Bachelor of Computer Applications (BCA) | DAVV – School of Computer Science & IT, Indore

2021 – 2024

CGPA: 7.0

ACHIEVEMENTS & LEADERSHIP

- Vice President, DAVV University (2022–2024, ABVP) - represented the student community and coordinated with university administration.
- Head Coordinator, College Annual Cultural Fest - led end-to-end planning and logistics for a large-scale, multi-volunteer campus event.
